

Have your say

Digital Access to Healthcare

Healthwatch Worcestershire want to understand what you think about finding information and communicating with health services online.

During Covid-19 health services have been using telephone and video call consultations in place of face-to-face appointments.

There has also been an increase in the use of email and text message communication and ordering of prescriptions online.

We know not everyone has access to the internet or finds it easy to use.

Please complete our survey

to share your feedback and experiences

We will use your feedback to tell health services about the things they need to consider when they are planning how services will operate in the future.

Contact us for more information, paper copies of the survey or to complete the survey by phone -
